HOMETECH TRANSFER

DALLAS–FORT WORTH

The keys are only part of the handoff.

Lighting, audio, thermostats and apps can stay with the house. Knowing how to use them should come with it.

01

Know what stayed

Record the agreed devices, rooms and available model details. Keep uncertain information clearly marked.

02

Plan the changeover

Coordinate possession, access and authorized account changes. Flag steps needing an owner or installer.

03

Learn the controls

Walk through everyday use. Record what responded, what was not tested and what still needs attention.

Your Home Tech Passport

Device details, operating notes, available official manual references and next steps in one practical record. We agree who receives it. Passwords and access codes stay out of the report.

See an illustrated Passport

Start with your home.
